

Nautilus makes debut at IBEX (booth No. 2715)

Our new subsidiary “**Nautilus Marine Group, LLC**” is established in USA in 2009. The brand name “Nautilus” will present our anchoring system at IBEX [booth No. 2715](#) on **Oct. 12 ~ 14**.

What’s the special and advantages we’re different between other windlasses?

- Windlass safety cover design prevents injury to hands and fingers.
- Tensioning band keeps rope/chain splice in constant contact with chain wheel for smooth rope to chain transition.
- The Nautilus windlass also makes maintenance a breeze by allowing the windlass top to be removed to exam the rope and chain.
- Our unique gearbox bayonet connector makes it easy to install and remove while in tight areas like the anchor locker.

If you are planning to go to IBEX this October, your esteemed presence would be an honor for us.

Please kindly share your schedule with us and make an appointment.
